

Stay Together

Madi Diaz

Losing all this time
I gave it, and now I've waited all my life
How did you know where to find me? I've proved myself to you
Over and over, promise I'll be true
Believe me when I say it
Because I need to know that it's not just me
Say it out loud, I'll be right here listening I can see it all
The longer we stay together
The mountains start to fall
As long as we stay together
I can see it all Wake up every day
Life isn't easy, we live it anyway
We break through together. On the other side
I was alone until you came and walked into my life
With you, it all got better
Tell me so I can hear it's not just me
Say it out loud, I'll be right here listening I can see it all
The longer we stay together
The mountains start to fall
As long as we stay together I can see it all
As long as we stay together
As long as we stay together, together When it feels so right
It's always worth the fight
And it feels so right
I know it's worth the fight When it feels so right
And it feels so right
So right, so right
Yeah, it feels so right I can see it all
The longer we stay together
The mountains start to fall
As long as we stay together
As long as we stay together I can see it all
The longer we stay together
The mountains start to fall
As long as we stay together
As long as we stay together I can see it all
We stay together
As long as we stay together
We stay together
