

Predators

Lost Alone

When we were young we played among the flowers
And sucked upon the nipples of our motherstits But now before us all of nature cowers
Through fear and death we've moulded out relationships The breeze is blowing lightly through the tree tops
The sun is out, we're basking in the light of day
The birds are eating bugs out of our sore spots
The clouds are drifting as we dream the hours away But I got restless, felt a little hungry
So I jumped into my car
Did not go far
Found a parking spot
And got out for a walk
Using my eyes, using my ears
I'm walking I'm smelling
I'm walking I'm smelling
Something's cooking
I smell something cooking
Something's cooking
I smell something cooking
It's running, but I'm faster
It's jumping that's what I'm after There's new life for us to eat
I prey on the young and weak
There's new life for us to eat
I prey on the young and weak What's your problem, life's a breeze
First you run and then you eat The pavement bubbling tar along the runway
The purring of our engines drives the birds away
A thousand voices cry in the arena
A thousand voices cry with just one thing to say
When we were young the world was like a vision
The colours and the sounds they look out breath away
But now we watch it all on television
While eating processed meat off of a plastic tray But I got restless felt a little hungry
So I jumped into my car
Did not go far
Found a parking spot
And jumped out for a walk
Using my eyes, using my ears
I'm walking I'm smelling
I'm walking I'm smelling
Something's cooking
I smell something cooking

Something's cooking
I smell something cooking
It's running, but I'm faster
It's jumping that's what I'm after
There's - life for us to eat
I prey on the young and weak
There's new life for us to out
I prey on the young and weak
Life is simple, here's the key
First you rest and then you feed
We're Predators
We're Predators you and I
I have no blood on my hands
I have blood on my teeth
Relish
