I Want To Go With You

Panda Bear

I want to go with you
To that another world
The one your love takes me to
I want to go with youI wish I were glass
So you could see through
Then you'd know before you ask
That I want to go with youI want to go with you
To that another world
The one your love takes me to
I want to go with youYou take me away
To a world I never knew
What else can say?
I want to go with youI want to go with you
To that another world
The one your love takes me to
I want to go with you
The one your love takes me to
I want to go with you
