

# Aftertaste

## Shawn Mendes

Rewind, Friday night never forget it  
How you let me go  
No more lies I'll be fine I know where I'm headed  
Probably should've known Now you're gonna say pretty please forgive me  
Fool me once told you twice you're gonna regret it  
Now you're all alone yeah Turns out that no one can replace me  
I'm permanent you can't erase me  
I'll have you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste Close your eyes, you can hide  
Try to forget me, but I'm everywhere  
I'm the smell on your sheets you regretted  
When you left me there Now you're gonna say pretty please forgive me yeah  
But it hurts it gets worse you know nobody said it would be fair  
Oh Turns out that no one can replace me  
I'm permanent you can't erase me  
I'll have you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste And now there's something in your way  
'Cause you threw it all to waste  
And you wonder if you could take back what you did that day  
And it hurts 'cause Turns out that no one can replace me  
I'm permanent you can't erase me  
I'll have you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste Truth is that no one can replace me  
I'm permanent you can't erase me  
I'll have you remember me  
One more kiss is all it takes  
I'll leave you with the memory and the aftertaste  
And the aftertaste
