The Night Is Over

Amorphis

We craved the light
From the darkness
It's a morning of misfortune
The dawn of a mankindListen to me
Instead of a blind folk's speak
Forget the mature plan
We are but humans you'll seeI can hear the silence
See invisible emptiness
Tarnish the halo of your guidance
And the night is overAnd the night is over
And the night is over
And the night is overOh yeahThat women in grief
Luxurious Gehenna
And what I have become
What I have done to you, yeahListen to me
Instead of a blind folk's speak
Forget the mature plan
We are but humans you'll seeI can hear the silence
See invisible emptiness
Tarnish the halo of your guidance
And the night is overAnd the night is over
And the night is over
And the night is overI can hear the silence
See invisible emptiness
Tarnish the halo of your guidance
And the night is over
