

The Ocean Galaktik

Brendon Small

Voices in my head say to me
I took a trip alone to the deep
Faded from the sacred moon that tells me where to go
The haunted melody that elates me evermore
Force the Treasonous mariners and stare
Their dead gaze warned us all Some won't swim to gold
Some of them outshine them all
Show love through it all
Pray through my soul
Could this be what I need
To guide me free
Assuming
Leave this all behind and look away
Though we almost drown we don't go 'way
See the world below reborn
Speak the words become the storm
In this waking dream I feel a ghost
They say your heart is still like a clock
Bodies on the ocean floor fade away
Replaced by the queen of this fantasy
The force of this god has revealed herself
Power to the beast queen alive
(And she says)
We are the sky
We are now the dust from the stars
We are the rain
We own the night
We are the sky
We are the dust from the stars
We are the rain
We own the night
Show love through it all
Pray through my soul
Could this be what I need
To set me free
I'm ready to serve my planet now
