

All You Good Good People (Fierce Panda version)

Embrace

I feel like I meant something you always say you need more time
Well I'll stay right here and I'll wait for good until I find a love worth mine
Someday you've got it coming it hurts me when I read the signs
So loud and clear that I'll make you glad if I'm leaving first and crying
All you good good people listen to me
You're just about done with the way that you feel
When nothing rings home enough to dig your heels in
You don't have to leave me to see what I mean
All you good good people listen to me
And all I want to do is find my name upon the line
Before I have to lose this I want time
All you good good people listen to me
You're just about done with the way that you feel
Nothing rings home enough to dig your heels in
You don't have to leave me to see what I mean
Lose all your fears
They are keeping you down
You won't have to fake it while I'm around
All you good good people listen to me
