

# Stars

[Kat Deluna](#)

You're like a target off in the distance  
It's a long shot but it's worth a try  
Seems like forever since I've ever felt this  
Your energy is taking over All I want is to pull you close  
Baby, let it all go, we can let ourselves fall  
I know all you want is to pull me close  
Baby, let it all go, we can let ourselves fall  
Forever Let the stars align  
We could be here together  
Till the end of time  
If the stars align  
Till the end of time  
If the stars align  
Till the end of time  
All I want is to pull you close  
Baby, let it all go, we can let ourselves fall  
I know all you want is to pull me close  
Baby, let it all go, we can let ourselves fall  
Forever Let the stars align  
We could be here together  
Till the end of time  
If the stars align  
Till the end of time  
If the stars align  
Till the end of time  
Forever  
If the stars align  
We could be here together  
Till the end of time  
If the stars align  
If the stars align  
If the stars align  
If the stars align Let it all go, we can let it all go  
Let it all go, we can let it all go  
Let it all go, we can let it all go  
Let it all go, we can let it all go
