

# Any Fool

## Warehouse One

Conversation, in moderation there's devastation that we really don't talk about denigration, condemnation, there's desperation that we really need to talk about Legislation, intimidation, indoctrination that you're not allowed to talk about same explanation, on every station, disinformation is a tool to make you shut down and believe in all their lies the man on the screen is in disguise any fool can make a rule and any fool will mind it

Administration, education, regulation it all comes from the same place crowd formation, militarization, clarification that's a bullet in your face so don't believe in all their lies the man on the screen is in disguise any fool can make a rule and any fool will mind it don't believe in all their lies the man on the screen is in disguise any fool can make a rule and any fool will mind it any fool can make a rule and any fool will mind it yes any fool will mind it
