

Marge's Song

Frankie and the Giants

when i caught your eye
for the first time
i never wanted nothing
until you said so sweet
hey darling dance with me
just the new girl in town
i never thought i'd find you
but babe you got me feeling
something so brand new
now i've got you in my soul
we're together growing old
i got my best friend walking with her hand on my hip
and we have seen this world
i got my best friend walking with her hand on my hip
and we have seen this world
we've walked so long together
i can still remember when it was brand new

what i said to you
at the drive-in movie
said it's been three weeks now
and i can't keep this pace
you've got me running crazy
from what i can see (from what you can see)
we can leave this now (we can leave this now)
or you can take this ring (oh i'll take the ring)
you can marry me
now i've got you in my soul
we're together growing old
i got my best friend walking with her hand on my hip
and we have seen this world
i got my best friend walking with her hand on my hip
and we have seen this world
we've walked so long together
i can still remember when it was brand new
love so deep we can lead our lives
living this world through lovers eyes
love so deep we can lead our lives
living this world through lovers eyes

love so deep we can lead our lives
living this world through lovers eyes
living this world through lovers eyes
now i've got you in my soul
we're together growing old
i got my best friend walking with her hand on my hip
and we have seen this world
i got my best friend walking with her hand on my hip
and we have seen this world
we've walked so long together
i can still remember when it was brand new
