

# Never Far Behind

Aly & AJ

I know this really isn't you  
I know your heart is somewhere else  
And I'll do anything I can  
To help you break out of this spell I see you following your crowd  
I know you're trying to fit in  
But if you're gonna find yourself  
You gotta start from deep, deep within Hold on to what you believe I will always be your friend  
I know who you are inside  
I am with you till the end  
Never far behind I am standing in the distance  
You can take your time  
And I will be here waiting  
Never far behind, yeah  
Never far behind I am sending you a message  
Don't ever think that it's too late  
When you care about someone  
There is always room for change You're allowed to make mistakes  
It's a part of every life  
I don't see you any different  
The truth is shining in your eyes Hold on to what you believe I will always be your friend  
I know who you are inside  
I am with you till the end  
Never far behind I am standing in the distance  
You can take your time  
And I will be here waiting  
Never far behind, yeah  
Never far behind You can take your time  
And I know  
With all my heart I will always be your friend  
I know who you are inside  
I am with you till the end  
Never far behind I am standing in the distance  
You can take your time  
And I will be there waiting, waiting by my side  
God is never far behind I am sending you a message
