

# Vapor

Jennifer Paige

I can take you down to everywhere I go  
Never want to take you down that low  
Been starin' out my window  
Into negative space  
On the pavement from the elevator  
Down the cornershop to buy the paper  
Had a premonition you would be there too  
No way not today  
It's just more bad news

CHORUS

I want to be vapor  
Want to rise above the year  
I want to be steamy  
And dry up all my tears  
Cause with my head in the clouds  
I'd be light upon my heels

I want to be vapor  
I want to be vapor  
And disappear sometimes  
My heart is heavy  
I feel I'm sinking in

My sister tells me that I spread myself too thin  
Feel like standing in a plaster mold of me  
What I have is not contagious

I see a smile on a passing stranger  
Think to follow them to see where they go all day  
Wanna know how it is they get that way

CHORUS

I want to be vapor  
Want to rise above the year  
I want to be steamy  
And dry up all my tears  
Cause with my head in the clouds  
I'd be light upon my heels

I want to be vapor  
I want to be vapor  
And disappear sometimes  
I want to be vapor sometimes, oh yeah  
I could take you down to everywhere I go  
But I never want to take you down that low

Oh no Oh no

CHORUS

I want to be vapor  
Want to rise above the year  
I want to be steamy

And dry up all my tears  
Cause with my head in the clouds  
I'd be light upon my heels  
I want to be vapor  
I want to be vapor  
And disappear  
I want to be vapor  
I want to be vapor  
And disappear sometimes I want to be vapor sometimes  
I want to disappear
