

Mission Impossible

Golden Earring

From the Albums:

* N.E.W.S.

* Something heavy going down
He drove his car into the city

The engine hot, the heat was on

He realized, he'd come to a crossroad

and there's only one way he knows

They're not gonna get me

and I'm never gonna be betrayed no more

He was back and someone had to pay

for the time that he had done

When diamonds shine on pretty ladies

Stool-pigeon is always around

They're not gonna get me

and I'm never gonna be betrayed no more

Step in my boots and see if you can make it

Take my chain and see if you can break it

Mission impossible

Chased by a low invincible

I don't mind, I don't care

I'm used to fighting my way back

Unaware of a mission impossible

It was a fact he was smarter than the others

Still controlled his part of town

It was an eye for an eye in the shadows

Looking down the barrel of a gun
