

Listen

Amos Lee

Listen
Listen to them church bells ringing
Listen Listen
You can hear them hounds
Calling off in the distance
If you listen You can hear the engines stalling
You can hear the angels falling And travel
You find men and women all have trouble
If you travel You will find that for the poor
Are victims of the gun or gavel
If you travel But be careful now
Be careful of all them folks out there
Who surround you Be careful
Some of them really only
Wanna ground you They only want control
To tear you down to that hole
So be careful, yeah Now listen
Listen to them church bells ringing
Listen Listen
You can hear them hounds
Calling off in the distance
If you listen You can hear the engines stalling
You can hear the angels falling
You can hear the engines stalling
And ohh, the angels falling
Alright
