Love Story

Matt Cab

If I wrote a story
Would you live it with me?
Fill the pages up with memories still to come
Let's write a love story.When I got you next to me
Feels like I'm living a dream
I never wanna wake up
I'm right where i wanna be
You fit me perfectly
You're all I'll ever needSometimes the world is moving so fast
And I just want it to stop
Every time I fall down you bring me back to the top
I've been lost without a clue, without you
When I close my eyes all I see is you.If I wrote a story
Would you live it with me?
Fill the pages up with memories still to come
We don't need an ending
Just a good beginning
Let the words just take us where we need to be
Let's write a love storyWe don't need to make believe
I've got you and you've got me
No doubt this love is so real
If you take a chance with me
We'll write our history
You're everything I'll ever needSometimes the world is moving so fast
And I just want it to stop
Every time I fall down you bring me back to the top
I've been lost without a clue, without you
When I close my eyes all I see is you.If I wrote a story
Would you live it with me?
Fill the pages up with memories still to come
We don't need an ending
Just a good beginning
Let the words just take us where we need to be
Let's write a love storyIf I could write a 1000 versions of my life
I would make sure that I met you every time
Under the blue sky on the roof top
When I heard you call my name
There is nothing I would change about that dayIf I wrote a story
Would you live it with me?

Fill the pages up with memories still to come
We don't need an ending
Just a good beginning
Let the words just take us where we need to be
Let's write a love story.
