

Return Our Lives

Neverending White Lights

The right side of my head is always in pain
But the left side of my heart is still the same

She was brave while they took me away

And I asked if she could come back and see If they'll return our lives Regrets from the past promises made

Like when we stayed silent for days

Our hearts rise like no one cares

To wait for my love come back and see Springtime for one day My saviour complains that he wants more
love I'm out of love
