

# Does It Float

## Dinosaur Jr.

The rain has washed my dog with fear  
A question people think, I call a friend  
And the next wave is valentine See yourself call, no big deal  
Ever since that's not a fear  
Wishin' the lamp would shine  
And beam me at it, give me some fuel Find a way, to clog it up alone  
Terrified, the way you stand  
Feeling natural behind the phone Rain has fallen, the tree does cry and [unverified]  
And the toads are running free and [unverified] It's no fun to that's what stinks  
Bought a carrot and still can't see  
You know I've been waiting for 6 years  
For a ray of hope, leaves me a float Then I could believe in sunshine  
In the winter time, mountains glow  
There's always so much to adore  
There's a little scenic picture on my skull See the second building, imagine  
Where'd you go, all I wanna know baby Does it float? Does it float? Does it float?  
Does it float? Does it float? Does it float?  
Does it float? Does it float? Does it float?  
Does float, why? Does it float? Does it float?
