

That's the Way Love Is (Acapella)

[Byron Stingily](#)

Two people take a vow to be together
and live and love each other forever.

They promise to love a lifetime
funny thing then they change their minds.

They both go their separate ways and love is just a memory.

But a young heart doesn't stay sad long another love soon comes along. That's the way love is
that's the way love is that's the way love is.

Two people don't get along

deep down in both have feelings very strong They try hard to conceal it.

Their hearts burn 'cause they both know they can feel it. That's the way love is
that's the way love is that's the way love is. Lovers leave without a reason

feelings change just like seasons.

In love nothing's for certain There's no use in pretending what's behind the curtain. That's the way love is
that's the way love is that's the way love is. No one knows how this feeling goes

it's hard to believe

Even stranger to conceive.

It's so gratifying

love's feeling

ain't no denying.

Yet it's so unfair when the feeling's no longer there.
