

Lavaging Expectorate of Lysergide Composition

Carcass

Officinal, immiscible compounds are mixed
A gagging expectorate of lysergic acids
Premensely emerged, consciousness slowly sips
Peculated in an ebriating narcosisCataleptic
Imbibe neurotripsickNeurally numbed, cytosol so translucent
So pernicious, hallucinogenics
Procreating, ocular contortion
Idiosyncrasy is now expropriatedExtirpation
Mind termination
