## **Lavaging Expectorate of Lysergide Composition**

## **Carcass**

Officinal, immiscible compounds are mixed
A gagging expectorate of lysergic acids
Premensely emerced, consciousness slowly sips
Peculated in an ebriating narcocisCataleptic
Imbibe neurotripsickNeurally numbed, cytosis so translucid
So pernicious, halluciagenics
Procreating, ocular contortion
Idiosyncrassy is now expropriatedExtirpation
Mind termination
