My Friend

Tristam

Advisory - the following lyrics contain explicit language:

In the wind, I hear my name
with the ones, starting the games
Call me now, cause I can barely breath
Oooh, I can feel you chanting lively
I can feel that music in me
We were born just to believeAnd when it's all over we can be together
Venture to the world inside
I can see in deeper
I can see in clearer
I'll never be afraid to die again
I'll always be there for you, my friendAnd after all that we've been through
Will this light lead me to you?
I can't stay here one more day
I swear to you, I'm not afraid
Through the wind chimes, through the bells
I will carry you through hellIn the wind, I hear my name
With the ones, starting the games
call me now, cause I can barely breath
Oooh, I can feel you chanting lively
I can feel that music in me
We were born just to believe
