The Fire

Token Entry

The Fire

We're still here here and now you're gone
what's the matter did we do something wrong
the things you said did you ever mean
or did you pretend that you believed
you went your way we stood behind
but we're ahead of you with a peace of mind
now you're standing still an we moved ahead
fighting a cause you said was dead

the fire still burns the rage still yearns

you went your way we stood behind
but we're ahead of you with a peace of mind
now you're standing still and we moved ahead
fighting a cause you said was dead
that was years past and now it's grown
to something more positive than you've ever known
things have changed but we still believe
in freedom trust and honesty

we have something we call our own
it's our scene we'll let it be known
we have set a direction and followed through
the goals we achieved we never needed you
