

# Time

## Auryn

You know they say we come here alone  
we leave alone and that's what scares me the most

Just like the sun that's shining down  
it fades away and yesterday is gone.

But it's only time oh yeah  
sneaking up on me when my back is turned  
Oh it's only time.., oh yeah  
bringing up all the things that I never learned

You know they say we live and die with trust  
that all of us have some great purpose here  
but it's never been my tongue is tied again  
I ask away.., is my defining moment near?

If it's only time...
