These Times with You

Dead Moon

I had to trace the clouds with the dark side looking in
I couldn't play the lie, it's just the way it's been
I never wanted to clear the pages in my life
I just came across to try it one more time
I wanna live these times with youI couldn't find the road, the signs had been wiped out
I couldn't hear you after silence stunned the crowd
I was ready for change before it slipped away
I wanna steal the heart that holds the break of day
I wanna live these times with youWith some false delay before we take the fall
We seem to capture the pain before we face the wall
I never understood the things that cause our plight
I guess shadows falling down won't make things right
I wanna live these times with you
