

I Like You

[Rosi Golan](#)

A thousand bits, a million parts, tiny pieces that make your heart

And I like you

I heard you whistle, the song we dance to, you remember the smallest detail

And I like youOoo ooo ooo I like you

You ooo ooo ooo I like youOur footprints re-arranged the leaves, you pulled me tight, and said you see

I like you

You wrote your name on my sleeve so I can keep you always with me

And I like youOoo ooo ooo I like you

You ooo ooo ooo I like youThe creases in the corners of your mouth when they curl into a smile

That forms around you like a giant light, and warms me from the insideAnd we'll grow up, but not just yet, stay

here longer so we don't forget

I like you
