Cross the Line

Dynazty

We've crossed the line of dignity, upon us lay a curse
Herald into infinity like gods amongst the worst
The common line we amplify was never to be heard
The dream that we would deify is now forever burnedA menace to the entity
We atone our deadly sins
Walk the road of empathy
And a new world beginsCross the line, redefine, break away unbent, unafraid
Together we stand in the dark
Seeking the light and what is right, together we cross the line
Our journey will come to an end and then our human cause will be justified.
JustifiedBeyond the flow of space and time we stumble upon a door
A crossing bridge to another world we have never seen before
The open road ahead will safely lead us through the storm
We are ascending to a higher form
And a new life is bornSee through the cloud of hypocrisy
In sympathy we trust
Fulfill the spoken prophecy
And our cause will be justCross the line, redefine, break away unbent, unafraid
Together we stand in the dark
Seeking the light and what is right, together we cross the line
Our journey will come to an end and then our human cause will be
JustifiedTake the step you won't regret, look for the sun behind the dark cloud of lies
Turn the key and you will see the answer has been right in front of your eyesCross the line, redefine, break away unbent, unafraid
Together we stand in the dark
Seeking the light and what is right together we cross the line
Our journey will come to an end and then we all
Will cross the line, redefine break away unbent unafraid
Together we stand in the dark
Seeking the light and what is right together we cross the line
Our journey will come to an end and then our human cause will be
Justified
