

Wildfire

[Tinashe](#)

Feel the calm before the storm
I'll be leaving in the mornin'
You were my sweet summer song
But the summer's gone and I can't keep your fire burning
You're poison running through my veins
End it with a spark into a pool of gasoline
Wildfire
Flames rising
Hit me like a bullet
Finger on the trigger pull it, pull it
Wildfire, burn baby
Burn for me
Castles crash in the sand
As they're swept into the sea
I could never understand
How you're easy come easy go
As you please
You're poison running through my veins
End it with a spark into a pool of gasoline
Wildfire
Flames rising
Hit me like a bullet
Finger on the trigger pull it, pull it
Wildfire, burn baby
Burn for me
Wildfire, burn baby
Burn for me
Let me go let me go
Wildfire
Flames rising
Hit me like a bullet
Finger on the trigger pull it, pull it
Wildfire, burn baby
Burn for me
