Under Flaming Skies

Stratovarius

The wind is blowing
There's ashes in the air
The heat is flowing
You stare in despairHear the warning
The times are changing fast
The Earth is crying
With a thundering blastHear the ground speaking
The powers unknown, a release
The ground's speaking
The freezing pastWheel of the night
A shelter from light
The skies are burningWheel of the night
Hide from the light
The winds are burning
You're under flaming skiesThe sacred fire
Is spreading, destroying all
The exploding spire
Will finally fallHear the ground speaking
The powers unknown, a release
The ground's speaking
The freezing pastWheel of the night
A shelter from light
The skies are burningWheel of the night
Hide from the light
The winds are burning
You're under flaming skiesWheel of the night
A shelter from light
The skies are burningWheel of the night
Hide from the light
The winds are burningWheel of the night
The skies are burning
Wheel of the night
The winds are burning
You're under flaming skies
