Love In 3D

Soma Sonic

First it seems like a dream
You hide inside an absent mind
Time's wheel is motionless
You just feel this warmth inside
Unknowingly travelling
In this land of thoughtlessness
You earnestly follow this state of trance, which carries you.Away with delight... Away with delight... Away with delight... Away with delightNow, ---------- a seal
has been engraved in your heart
The anchor sets in deeper
And entwines you forever
Your need of each other
Is lighter than clear water
Everything about you
Know that your love will carry youInside with delight... Inside with delight...
Inside with delight... Inside with delight...
Oh...it feels so good, Oh...it feels so greatLucky, you are lucky in love
You can't withhold
You can't deny that for youit goes as high as the sky
Then at the highest level
When you think you've reached the topYou follow the path of light
With your arms open wide
Soon your life will expand
on the reflections of your love
A new life will spring forth
A happy face smiling back at youGrowing with delight...(repeat)
