

Balloons

Foals

There's a thing called
There's this thing called
We fly balloons on this fuel called
We fly balloons on this fuel called love
What's a chkacha? What's a fuel called?
Fairweather storms are in your head
Fairweather storms are in your head We fly balloons on this fuel called love
We fly balloons on this fuel called love
We fly balloons on this fuel called
We fly balloons on this fuel called love There's a thing called
There's a thing called
There's a thing called
There's a thing called There's a thing called
There's a thing called
There's a thing called
There's a thing called We fly balloons on this fuel called love
We fly balloons on this fuel called love
We fly balloons on this fuel called
We fly balloons on this fuel called love We fly balloons on this fuel called love
We fly balloons on this fuel called love
We fly balloons on this fuel called
We fly balloons on this fuel called love
