Little Star

Sicko

You shine brightly in my sky
with me while the nights go by
catch a comet by the tail
if he hollers go to jailI had a spider monkey and his name was Bob
he had a nice smile and I liked him a lot
but he was nothing next to you
'cause you're my little star and you shine throughYou're my little star
my star, my little starThunder, lightning, sunshine, rain
when will I to see you again
(It should be "when will we two meet again"
but Ean blew it)
find a little lovers' lair
name the time and I'll be there
