## Fear Factory

HERE it comes Noise in the machine  
A world of lies backfires on you  
Choke cause and effect  
Built to collapse the final breakdown To the system  
To the system Fire weapons of fear  
Human affliction ever grinding us down  
Blood fuels the engine of dissension  
We are scabs and the scars now We are nothing to the system  
We are nothing to the system To the system  
System  
To the system We are nothing in the end  
Betrayed and disowned  
To suffer alone  
We are nothing in the end  
Betrayed and disowned  
To suffer alone We are nothing to the system  
We are nothing to the system To the system  
System  
To the system
