Turn The Lights On

[Saliva](#)

Turn the light on
I want to see you the way I used to
Before the moment's gone
I used to know you but now we're strangers
Lost in all this anger
I got to face the dark to see the dawn
Got to make it right before it's wrong
I will throw you a lifeline
Pull you back to me
Hold you close so you can feel
The way we used to be
When it was all or nothing
Through everything we shared
Turn the lights back on
I need to know that you're still there
Turn the lights on so can see me
You know I'm not a memory
Yeah, I've been here all along
They always said that we wouldn't make it
We'll lose our faith in it
But my faith is still strong
You know they got us all wrong
I will throw you a lifeline
Pull you back to me
Hold you close so you can feel

The way we used to be
When it was all or nothing
Through everything we shared
Turn the lights back on
I need to know that you're still there
Are you still there?
Should've known when we had it
We took it for granted
And now we got one more chance
To get it back
Turn the light on
I want to feel you the way I used to
I will throw you a lifeline

Pull you back to me
Hold you close so you can feel
The way we used to be
When it was all or nothing
Through everything we shared
Turn the lights back on
I need to know that you're still there
Are you still there?
Turn the lights on
Turn the lights on
Are you still there?
