lifeforms

diaphane

From the beginning
Small lifeforms
They can kill without warning
So you don't explode

Stump your growing limps and thinking
And you've lost them now you're blinking
And reminding her of him

Oh you steal his features
And your mother is a bleacher
She don't even feel the heat no
She don't even want to speak to you

But you, you always find another place to go
(Oh you) you always find another womb to grow

Well you can try to sink down deeply
And find the children lost at sea
Find the children who discretely
Be killed in infancy

To stop them holding you and screaming
That you'll lose your wildest dreaming
Still reminding me what I feel
How he left without reasons

But you, you always find another place to go
(Oh you) you always find another womb to grow

You can try to forget but I won't let you easy
You can try to forget but I won't let you easy
I'm flooding out and more I'm too washed out to see
Drifting away this time you'll regret you've conceived it
Clean up the dead you leave behind
Just like insects

Clean up the dead you leave behind
