

# Run the Night

## Wicked Lady

You're Living in the darkness  
Sleeping in the night  
Engine in the city  
Gonna run the night  
It's no way to live your life  
All your dreams are gone  
The modern world will help you to carry on

Don't look out your window  
Your eyes can only see by electric light

Medicine will help you  
Cut out all the pain  
Relying on your doctor to keep you sane  
It doesn't matter anymore  
Emotions stretched so tight  
The message in your mirror  
Says give up the fight

Don't look out your window  
Your eyes can only see by electric light

You're Living in the darkness  
Sleeping in the night  
Engine in the city  
Gonna run the night  
It doesn't matter anymore  
Emotions stretched so tight  
The message in your mirror  
Says give up the fight

Don't look out your window  
Your eyes can only see by electric light
