

Cancer

Eternity X

This is the story of all life's emotion
 Wrapped up inside one heart
I can be your love for the rest of your life
And always play the part Someone to love and a family
 Someone to hold and protect me
 I remember when I left your side
You asked me why You said goodbye Cancer baby, goodbye
 Take care of yourself inside
 Goodbye Cancer baby, goodbye
You just broke down and you cried The years I remember seem all to endless
 The shifting of moons and tides
 One minute I'm up the next I'm down
I'll leave you to wonder why Someone to stand by me
 Someone to look to for security
 I remember when I left your side
The look in your eyes You said goodbye Cancer baby, goodbye
 Take care of yourself inside
 Goodbye Cancer baby, goodbye
You just broke down and you cried Goodbye Cancer baby, goodbye
