Laughter In A Police State

Strike Anywhere

The government say that its what we need
to work until we die serving someone else's greed
they separate divide but its the same red blood we bleed
rob us of the fruit but we'll always have the seed
so people are speaking out against what they see
searching for the truth within the promises of liberty
people are imprisoned for what they believe
or is it just propagandaout of the gate we're all quick to defend
the sell out positions white-washed of content
to our hearts discontent
too afraid of our failures
faith and future unkown
do we dare and reach beyond ityou screamed in my face but I waited quietly
religious leaders, politicians, and the lies you say
from the economic poisons of the enemy
to the bottom of the bottle where the poor man stayor is it just propagandaout of the gate we're all quick to defend
the sell-out position white-washed of content
to our hearts discontent
too afraid of our failures
faith and future unkown
do we dare to reach beyond it
do we dare to stand alonedo you feel the pressure rising ?pressure rising
push the future
pressure rising
in the present we
push the rules and press the future
in a house divided
we will watch it fall
