

Nobody Can (feat. Aaron Bruno)

Deltron 3030

Advisory - the following lyrics contain explicit language:

Yo, avoiding the corporate sector running with the rebel operatives

Pulling a dark saber out on hostages

Deltron O from the under city wonders will they never cease

Fear of black planet, serious heat

Here in the street high doubts and strongholds

Action adventures go beyond the globe

The lost ones mobbing in repulsive trucks

Transporting troops and not for sport

My measurement systems are pleasant for listening

Imperial decree that legalizes conditions in certain instances

Battle techniques require split second timing

The usage designed with large spacecrafts in mind highly maneuverable

Turbo lasers will do more than subdue them fools

Provincial governor peripheral cameras cover

Every corner and crevice I catch a glimpse at

Deltron is our hero, if he can't do it nobody can, with the wave of a hand and a flick of the wrist word wizardry
will certainly give you a glimpse

(x2)

Yo attack on my research station on the coast of my private continent

They can't sway my confidence

With bloated, sugar-coated nonsense

Despite the strong sense of honor

It was I that assassinated the rhyme twat

Bombs drop cutting him off

Plus winning support from the people for what I have thought

A constant remembrance

The emblem with the heiro- insignia kept ruffling in the wind

They diminishing

Strength and size

Emphasize three eyes

Even in these bleak times

I'll be sure to speak my mind

Cause it ain't illegal yet
The thought process
Fools lost in a time warp wishing for the final course
Cross reference the alien amenities
Vector technologies and the prison facilities
Discovery of the plans were really what he had sought
Put lovers of the new order on their luxury yachts
Served as a commander for hip-hop's elite fleets
Planets of the galaxy understood my feats
Deltron is our hero, if he can't do it nobody can, with the wave of a hand and a flick of the wrist word wizardry
will certainly give you a glimpse

(x2)

Deltron is our hero, if he can't do it nobody can, with the wave of a hand and a flick of the wrist word wizardry
will certainly give you a glimpse

(x2)

All biological chemical scramblers
Electromagnetic probes taking a gander
Incredible stratagems for millennia
Kept my folks in with love we still defending em
The realist path prevents most from killing each other
But still something suggested undercover
Guidelines with interactions taking precedent
Primary news agencies leaking the evidence
Semi-precious stones hoarded at home
Since the great collapse finance has taken back
Now the crime wave by the mind slaves
Got the populous trying to escape
To a new planet flying in space
Interplanetary officials secretive and aloof
Created a capitalist move to overshoot
The chaos and effectively cashout as they lost
Issuing the galactic civil war to keep the days long
The surest options? neurotoxins
Erase the data file to the central computer and stop it
