

Turn to a Smile

No Justice

Sometimes I lie awake at night and I can't close my eyes
Thinking about you
Times like this i realize that I can't help myself
Crazy about you
Ain't it funny how life fins a way somehow to bring two things together
It's bittersweet
How the Lord sought out an angel to open my eyes, and knock me off my feet
When I'm standing on that stage
with those lights in my face
I think of you and my lips turn to a smile
It'd take a lifetime to erase
I hate to see you leave, you seem so far away
But I still feel you
Make a call on the telephone to hear about your day
And to say I miss you
Every time the wind blows I can feel your touch
It gets me through another day
With a long stretch of highway combined with a lack of time
But our love will never fade
When I'm standing on that stage with those lights in my face
I think of you and my lips turn to a smile
It'd take a lifetime to erase
