

I Want It All

Colony House

She's steady, with nothing to prove
The wind blows, the house doesn't move
My love
My, my, my love is true Long distance is bringing me low
I'm tired, of being alone
But my love
My, my, my love is true I know it's nothing that I need to tell you
You've got my back but I don't want to fail you
I want it all, now, I want it all
Long distance and my phone doesn't work anymore
No distance with your arms wrapped around me at home
I want it all, now, and that's for sure
Born with a fever, baby, and you're the cure She's steady, and she's feeling the pull
I can't blame her, I'm feeling it too
But my love
My, my, my love is true
Oh, yes, I said
My love
My, my, my love is true I know it's nothing that I need to tell you
Although I wander I don't want to fail you
I want it all, now, I want it all
Long distance and I know I haven't talked to you much
No distance when I'm home and I'll remember your touch
I want it all, now, and that's for sure
Born with a fever, baby, and you're the cure And I don't know what I need to say
To warm your heart at home, to ease the pain
But I can do what I promised you
Put ya on my back and pull you through
We're going to be okay
And I know, I know, I know
Just how quickly tables turn
Will I ever learn
Don't play with fire, you know how that goes I want it all (I want it all) and that's for sure
Born with a fever, baby, and you're the cure
I want it all (I want it all) and that's for sure, baby
Born with a burning fever
And you're the cure
