

The Stars That Play With Laughing Sam's Dice

Jimi Hendrix

The stars up above that play with laughing sam's dice
They make us feel the world was made for us
The zodiac glass that gleams come through the skies
It will happen soon, for you And away we go
Yeah

Thank you very much for coming
Thank you very much

And now we would like to bring to you our one and only friendly neighbourhood experience maker
Right now listen

Thank you very much

The milky way express is loaded, all aboard
I promise each and every one of you you won't be bored
Now this pastime gets everybody honest and straight
What I'm really singing about

Is my grandmas pair of butterfly roller skates

Thank you, thank you Now watch the ride Uh, I meant to say that there'll be no throwing cigarette butts out the
window

No throwing cigarette butts out the window, thank you

I hope all of you brought your toothbrush

Now to the right you will see Saturn

Outta sight, really outta sight

And if you look to the left you'll see Mars

Yeah, OK. Yeah, OK.

I hope your brought your parachute with you

Hey! Hey, look out! Look out for that door!

Don't open that door!

Don't open that door!

(Ah, man!)

That's the way it goes

And now we're coming through the Milky Way section, yeah

Bring your cornflakes and stuff like that, Milky Way

Yeah, everything is all right, outta sight

If you look around you, you will see a few minds being blown

It's happening, it's happening

Yeah!

I hope you enjoy your ride; I am!
