Death to All the Pigs

Naked Aggression

Death to all the pigs The hitmen for the politicians Someday they will pay For all the crimes that they've committed Doing the dirty work for the rich lawmakers They never question the fucked up laws they enforce Racist and sexist they violate basic rights The only good cop is one that lies dead on the ground There's a difference between peacekeepers and fascists! It won't be long before they come to take us away Police are paid to control you If they need to, they will kill you Their idea of law and order Is maintaining rich man's power Death to all the pigs The hitmen for the politicians Someday they will pay For all the crimes that they've committed Doing the dirty work for the rich lawmakers They never question the fucked up laws they enforce Racist and sexist they violate basic rights The only good cop is one that lies dead on the ground There's a difference between peacekeepers and fascists! It won't be long before they come to take us away The government wants compliance All dissenters will be silenced A police state will be installed The police will come to kill us all Not if I can help it! I can see a day When we will be free of them No police, No more war, No more ric, No more poor Someday, someday, someday, Freedom will be ours!
