Surface

Eva Under Fire

I could get lost in the silence/lost in the violence
Lost if you didn't follow me
Gone and forever time is whatever
Nothing matters when you're already set to drown

Prechorus
Way down x4

Chorus
Shatter the surface break me free
Sinking you're the sound saving me

Verse 2
Time stands still in the silence
Lost in the silence, time is forever
Life moves on
Time moving onward, timeless surrender
Nothing matters when you're already set to drown

Prechorus

Chorus

Bridge
Way down, you are the sound I heard
Way down, shattered
Way down, you are the sound I heard
Way down, shattered
