

# Light Outside

## Wakey! Wakey!

I know you want to stay in bed  
But it's light outside  
It's light outside So know I am going to stay right here  
Because you saved my life once  
You saved my life And I will try to get you up because it's beautiful outside  
And we'll fall  
We'll try  
And do our best and I love you all the while  
Because you saved my life once  
Because you saved my life once I know you want to rest your head  
And just forget the night  
Forget the night  
So you know I am going to stay right here  
I'll sit by your side  
Sit by your side And I will try to get you up because it's beautiful outside  
And we'll fall  
We we'll try  
And do our best and I love you all the while  
Because you saved my life once (x4) I think I always knew you would be  
I think I always knew you would be  
The greatest (x2)  
I think I always knew you would be  
I think I always knew you would be  
The greatest (x2) Because you saved my life once (x4)
