

# Something Real

## Gin Blossoms

Wilson-Woodford I don't know if it matters

But i'm sorry that we made such a mess

Out of Love

I don't understand the pressure

Could this day get any better?

A long way from hard times i Win you again

The dark roads and hard snows

How could i know?

We just make it all up as we go Chorus:

So give me something real

That i can lay my head on

No fairy tales or Dreams

I'm sick of make believing

I made a promise long ago

It all fell apart i don't wanna let go

C'mon give me something real I don't know any better

But i know that i've made some mistakes with your love

i can't help but think

it matters

The illusion finally shatters A long time gone now to win

you again time slows hearts

Froze how could i know?

I just make it all up as i go... Chorus:

So give me something real

That i can lay my head on

No fairy tales or Dreams

I'm sick of make believing

I made a promise long ago

It all fell apart i don't wanna let go

C'mon give me something real I may or may not really know

It hurts to think it's worse to. Speak don't let go

The words i seek won't let go

A promise lasts forever... Chorus:

So give me something real

That i can lay my head on

No fairy tales or Dreams

I'm sick of make believing

I made a promise long ago

It all fell apart i don't wanna let go

C'mon give me something real So give me something real  
That i can lay my head on  
No fairy tales or Dreams  
it's over... i'm not what i had left behind  
i might be wrong but i know i tried C'mon give me something real  
C'mon give me something real  
C'mon give me something real
