Two Pieces

Demi Lovato

There's a boy, lost his way, looking for someone to play
There's a girl in the window tears rolling down her face
We're only lost children, trying to find a friend
Trying to find our way back home
We don't know where to go, so I'll just get lost again
We'll never fall apart, cause we fit together right, we fit together right
These dark clouds over me, rain down and run away
We'll never fall apart, cause we fit together like, two pieces of a broken heart
I know where we could go and never feel let down again
We can build sandcasltles, I'll be the queen, you'll be my king
We're only lost children, trying to find a friend
Trying to find our way back home

We dont know where to go, so I'll just get lost again
We'll never fall apart, cause we fit together right, we fit together right
These dark clouds over me, rain down me and run away
We'll never fall apart, cause we fit together like, two pieces of a broken heart
And I like to lay my head down and fall asleep
Oh, but I dont like to fall asleep to see my dreams, cause right there in front of me
There's a boy, lost his way, looking for someone to play
We dont know where to go, so i'll just get lost again
We'll never fall apart, cause we fit together right, we fit together right
These dark clouds over me, rain down and run away
We'll never fall apart, cause we fit together right, we fit together like two pieces of a broken heart
There's a boy, lost his way, looking for someone to play
