

# My Demolition Man

## Rita Hosking

My demolition man, he's got it all worked out  
he's got his radiator wired and the gas tank out  
His mama don't cry and his daddy's long gone  
And he spins through the mud to take somebody on

They bring out the flag. a little girl dressed in blue  
She sings "oh say can you see" a little off-tune  
With a helmet on his heart, and a fire in his eyes  
He's a spray painted warrior for you and me tonight

And the women from the bar wave their arms in the stands  
The tired-eyed fathers with the kids in their laps  
They're all rooting now as loud as they can for my demolition man

### Chorus

He drives through life like the cars that he runs  
Stay out of corners, don't get stuck on someone  
In the pit between heats, the sledgehammer swings  
He's licking his wounds till he goes out again

### Chorus

The sun sets on the rides at the fair  
They fly people high and they forget about their cares  
In the arena nearby, the engines roar  
They're bashing at each other till it don't hurt no more

### Chorus

---
