

# Angel Come Down

## Voice Of The Beehive

Late, it was always late when we would meet the only two around  
Too awake to sleep, too tried to lay down so we would dream  
And there were not too many words  
But I still hear them though they're vague  
Your gaze is gone but it is just as powerful Angel come down, angel come down  
Angel come down and grace me with your mercy  
My beloved angel come down Lonely but it's best in my quiet room, the stars above me shine  
It is here where you can often be found a memory  
This is the time when you would say, "Just go away"  
This is the time, when you would cry for me to stay  
Now I beg Angel come down, angel come down  
Angel come down and grace me with your mercy  
My beloved angel come down Wishing, one wish, anything, everything  
It might just come true Angel come down, angel come down  
See you come down and grace me with your mercy  
My beloved angel come down Angel come down, angel come down  
And grace me with your mercy  
My beloved angel come down
