Montreal Calling

Mobile

Let it come down, let it come down
Let it come down, let it come down
Thinking out loud, thinking out loud
Give me your car
You're alone and you stand there
On the phone crying my name
You're alone, desolation, broken heart
Won't you let it calm down?
Take me, take me, get me out of here
Come down, please, come help me out
Take me, take me, get me out of here
Come down, please, come help me out
Let it come down, let it come down
Let it come down, let it come down
Thinking out loud, thinking out loud
Give me your car
I'm alone driving out there
Coming home, losing my head
On the road but I'm not there
Montreal, won't you let it calm down?
Take me, take me, get me out of here
Come down, please, come help me out
Take me, take me, get me out of here
Come down, please, come help me out
Won't you let it come down, let it come down?
That's how the story goes
It's been a long way home
Don't wanna lose you, my love
Take me, take me, take me out
Take me, take me, get me out of here
Come down, please, come help me out
Take me, take me, get me out of here
Come down, please, come help me out
Take me, take me, get me out of here
Come down, please, come help me out
Take me, take me, get me out of here
Come down, please, come help me out
