

Unconditional

Tim Stop

Oh darling I don't remember how we got here
The past was so good, our love was just right
But oh darling if you're happier without me
I'll cry cuz you're gone, but I'll smile Cuz you taught me to love, you taught me to care
You gave me a best friend when nobody was there
It's killing me now that I gotta let you go
But I might survive as long as you know Wherever you are, I love you
Whatever you do, I always will
I hope someday you'll find me
My love it unconditional Oh darling there was a time do you remember
When you were all mine, our love was just right
But oh baby, if I could just taste that wine again
I'd give it all up for that chance You inspired my life, you stole my heart
You were my strength from the very start
I may never find that in somebody else
But it helps to remind myself Wherever you are, I love you
Whatever you do, I always will
I hope someday you'll find me
My love is unconditional I used to want you for myself
But as long as you're happy baby... You inspired my life and you stole my heart
You were my strength from the very start
And I want to share with you my life
But in case you can't be my wife Wherever you are, I love you
Whatever you do, I always will
I hope someday you'll find me
My love is...
Wherever you are just call my name
I'll race across this empty state
I'd leave tonight to find you
cuz my love is unconditional
It's unconditional
